SUN AUTOMATION

Company Description

SUN AUTOMATION CO., LTD is a leading provider of solutions and services in the industrial and automation sectors. We proudly serve as an Authorized Reseller of Beckhoff Automation in the Vietnam market. As an Engineering Project Leader, you will assume a crucial role in our organization, overseeing intricate engineering projects and leading a team of dedicated engineers. This position may also involve future responsibilities in supervising our mechanical design team.

Role Description:

The Engineering Project Leader is a cornerstone within Sun Automation Co., Ltd.'s Engineering Department. This role is pivotal for steering and directing engineering projects, with a specific emphasis on complex projects that necessitate seamless integration with mechanical systems or external collaborators. The Engineering Project Leader will also be entrusted with the supervision of engineers and actively engaging in the technical aspects of the projects.

- Department: Engineering Project Management
- Reports To: Director

Key Responsibilities:

1. Project Leadership:

- Lead and oversee engineering projects from inception to completion, ensuring adherence to timelines, scope, and budget constraints.
- Offer technical expertise and guidance to the project team.
- Foster collaboration with cross-functional teams to ensure the success of each project.

2. Project Team Management:

- Estimate resources, align engineers from the engineering department with appropriate projects, set clear performance expectations, and deliver regular feedback and coaching to team members.
- Provide training, mentorship, and support to engineering team members.
- Cultivate a culture of collaboration, excellence, and continuous improvement within the team.

3. Technical Expertise:

- Actively participate in engineering tasks, providing technical leadership and innovative solutions throughout the project's life cycle.
- Collaborate with the Solution Sales Team to ensure harmonization between product offerings and customer needs.
- Identify areas for improvement in project execution and implement corrective actions as necessary.

4. Customer Relationship Management:

- Cultivate and nurture strong relationships with key clients, partners, and industry stakeholders.
- Identify and address customer needs and deliver creative solutions.

5. Product Knowledge:

- Stay abreast of the latest industry trends, technologies, and product offerings within the industrial and automation sectors.

6. Cooperation with Mechanical and Construction Partners:

- Collaborate effectively with mechanical and construction partners during project execution to ensure seamless integration of mechanical systems.

Requirements:

- Hold a degree in Engineering or a related field.
- Possess a proven track record of successfully leading and managing engineering projects, with a minimum of 5-10 years of experience in a similar role.
- Exhibit strong technical and project management skills.
- Demonstrate excellent communication and interpersonal abilities.
- Proficiency in engineering software and project management tools.
- Possess an in-depth knowledge of mechanical and automation products.
- Ability to thrive in a fast-paced environment, adept at task prioritization and effective time management.
- Willingness to travel as needed.

Should you meet the outlined requirements and are enthusiastic about a role that involves overseeing intricate engineering projects, fostering collaboration, and ensuring seamless integration with mechanical systems and partners, we encourage you to explore the Engineering Project Leader position at Sun Automation Co., Ltd. Feel free to reach out to us for further details and discussions regarding this opportunity.
